Submitter Category: Individual

Tax Reform of the United States of American Individuals

As a citizen of the United States of America with the Bill of Rights set in place by our ForeFathers who wrote it, I strongly urge this panel to take into consideration the very dangerous deceit the current tax laws or implementation of them are enforcing on the people. This nation is facing a variety of areas of serious deceit on its people including taking us off the gold standard, attempting to rob its people of religious freedoms, the destruction of the family unit, the murder of innocent unborn American citizens made legal, the invasion of privacy, and unfair tax law enforcement's. In this comment to the panel I will address my personal opinion regarding the unfair tax law enforcements.

I would first like to remind the panel of our history. This nation became a nation because the individuals living on this land opposed unfair taxation. The people rose up and let England know their rage at the infamous "Boston Tea Party". The declared independence and war against England to fight against this unfair taxation. Our Constitution and Bill of Rights was written by our ForeFathers in a manner to PROTECT the people from that day forward. Unfortunately, the wealthy of the world would not give up just because the people residing on that land won a war.

Money controls a society and the fair or unfair use of it. I believe that taxes SHOULD be paid by the citizens, but a fair one. Our current Income Tax is NOT fair at all. I live in a state that does NOT tax its resident's income tax and it is one of the richest states in the Union. No one can convince me that the Federal taxes could not be structured in a similar manner giving the government PLENTY of funds to do what is needed. The Federal Income Tax has created a monster that not only effects the loss of

personal funds, but also personal health. Why do I say health? Because it causes stress and stress effects health which cannot be denied by the medical industry. Yes I said industry. I quote Dr. Benjamin Rush, Surgeon General of George Washington's Army and Signer of the Declaration of Independence "Unless we put medical freedom into the Constitution, the time will come when medicine will organize into an undercover dictatorship to restrict the art of healing to one class of men and deny equal privileges to others. All such laws are un-American and despotic and have no place in the republic. The Constitution of this republic should make special provisions for medical freedom as well as religious freedom." Dr. Rush's warning was ignored and medical freedom was not included in the Constitution and so what he feared has now come to fruition. The Federal Income Tax is contributing to the poor health of millions of American citizens today in the form of unnecessary and un-Constitutional taxation usury causing a tremendous amount of stress.

Because the current Income Tax enforcement's RE-tax the same income over and over again from one generation to another, millions of families have lost their homes and farmers their lively hood when their heirs cannot afford to pay the unfair taxes. The hard work of previous generations to ensure the security of their family is stripped away due to income taxes. Or the heirs are left with so little that the wealth once in their possession is stolen by their own government leaving a new generation to struggle just to keep a decent roof over their head and food in their families stomachs.

I am not a soldier or a revolutionary type of individual, but I predict that the people of this nation as a whole are headed towards another "Boston Tea Party" uprising of some sort. I don't how or when or by whom, but I do believe it is inevitable. Once the

people become fully educated and realize the deceit they will find a way to fight back. Hopefully it will not be a violent fight but rather a diplomatic legal fight. You as a panel reviewing this issue right now have the opportunity to start the procedure for tax reformation to a fair tax system that the people will respect. If the people's respect is gained then the people will ensure the prosperity of this nation's future. If the people's respect is NOT gained then the people will ensure an all-out legal war against its own government which will greatly use up precious time this world needs to mend its wounds and to stop terrorism world-wide.

I am personally ashamed of many things that our government has done historically and is doing presently. I personally believe that the only laws that should be followed by all people worldwide are quite simply stated in The Ten Commandments. If they were, there would be NO war, NO terrorism, NO abortions, NO paper promissory notes, NO national or state or province land boundaries, and NO unfair taxation. Respect, Integrity, Honesty, Love = The Ten Commandments...the ten laws given to humanity.

In closing I can only encourage this panel to take these ten laws into their hearts as they review what is the RIGHT and JUST recommendations to make to the leader(s) of this country. Throw out the greedy lobbyist twists of the wealthy who care NOT for their fellow human beings but rather only for themselves and how much they can gain by way of taking from others who are just as deserving of a good life as they are.

Sincerely,

Annette Scott, AC (American Citizen)
