

NORC DSM-IV SCREEN FOR GAMBLING PROBLEMS

The screen is set up to run first a lifetime screen for all items and then ask about the past year only for those items endorsed for lifetime.

How to score the items:

Lifetime: Add 1 point for every YES to any of the following items:

1 or 2	3	5	7	8 or 9	10
12	13	14 or 15 or 16			17

Past year: Add 1 point for every YES to any of the following items:

18 or 19	20	22	24	25 or 26	27
29	30	31 or 32 or 33			34

If gambler responds YES to more than one item in a response cluster (e.g., "8 or 9"), count them together as a single point.

Under the NODS typology, a gambler who scores zero points is a lifetime or past-year Type B gambler, and a gambler who scores a 1 or 2 is a lifetime or past-year Type C gambler. Scoring a 3 or 4 would mean one is a lifetime or past-year Type D gambler, which corresponds to what certain studies have called a "possible pathological gambler" or "problem gambler." A gambler who scores 5 or more on the NODS is a lifetime or past-year Type E gambler; by DSM-IV criteria, this person is a "probable pathological gambler."

Lifetime Problems

1. Have there ever been periods lasting two weeks or longer when you spent a lot of time thinking about your gambling experiences or planning out future gambling ventures or bets?

YES
NO

2. Have there ever been periods lasting two weeks or longer when you spent a lot of time thinking about ways of getting money to gamble with?

YES
NO

3. Have there ever been periods when you needed to gamble with increasing amounts of money or with larger bets than before in order to get the same feeling of excitement?

YES
NO

4. Have you ever tried to stop, cut down, or control your gambling?

YES GO TO 5
